

Take a look at the modern functional design for Cibes new platform lifts A5000 and A7000

New elegant and user-friendly design

New sensitive safety edge for added safety.

New control system enables the use of smartcards, etc.

New control panel with:

- large vandal resistant easy-to-use tactile push buttons
- emergency light
- stop button
- clear visible, easy-to read instructions.

The control panel, the hand rail and the upper sensitive safety edge are made of natural anodised aluminium as standard. Optional surface coatings to resemble birch, beech, alder-tree and white marble are also available.

Softly moulded hand rail in natural anodised aluminium for a firm and comfortable grip.

The vertical platform panels are painted in RAL 9006 as standard, but can be painted in any optional RAL colour. Your choice!

Hidden screws provide a smooth surface.

Cibes New platform lifts model A5000 and A7000 have been developed with the main focus on design and engineering expertise. The result is a new generation of modern state of the art platform lifts which combine new design with the latest technology. Smart aesthetic elegance, new materials, attractive pricing and a choice of options makes the Cibes new platform lifts the perfect accessibility solution for all types of buildings.

Cibes A5000

The A5000 is the state of the art model in our platform lift range. With the A5000 as the base product we can provide a broad range of alternative materials and colours.

The A5000 is provided with a 1.1 m high vertical facia with an integrated control panel and is supplied ready made with steel shaft panels or toughened and laminated safety glass panels for a fast and efficient site installation.

NEWS!

Cibes A7000

The New platform lift A7000 has a 2.2 m high vertical fascia with an integrated control panel. It is supplied with an aesthetically designed overhead light fitting and a mirror. The glass mirror is standard and a stainless steel mirror is optional.

Overhead light fitting with an inset screen pattern.

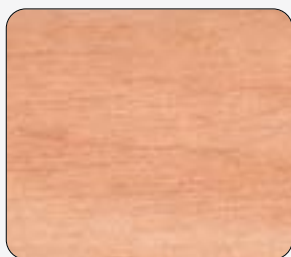

2.2 m high vertical fascia.

A mirror is standard.

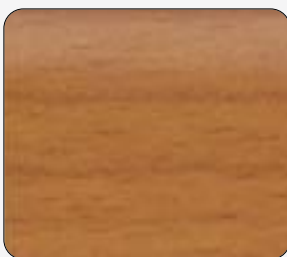

The control panel is made of natural anodised aluminium as standard. The optional surface coatings resemble birch, beech, alder-tree and white marble. The birch surface coating bears a resemblance to classic Scandinavian design. The standard aluminium control panel surface coating or the four different optional surface coatings will enhance most building environments.

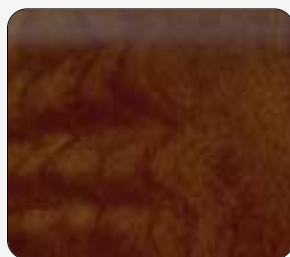

Please contact us for more information of our extensive range of platform lifts, doors, shaft panels, RAL colours and all options that are available.

Birch

Beech

Alder-tree

White marble
